

APPENDIX A
COPY OF CURRENT CLAIMS

1-26. (Cancelled)

27. An introductions system comprising:
 a plurality of mobile communicators; and
 a server communicating with said plurality of mobile communicators;
 said server being operative to store personal information relating to users
of said plurality of mobile communicators and to provide to a first user of said users via
said first user's mobile communicator, said personal information relating to a second
user of said users, upon designation of said first user by said second user, using said
second user's mobile communicator,
 said designation comprising employing a mobile communicator location
functionality for providing a visually sensible map indicating the relative locations of a
plurality of said mobile communicators in communication with said server in a space.
employing the mobile communicator of said second user to receive said map and to
designate the location on said map of said first user and determining a mobile
communicator address of said first user,
 said server also being operative to provide to said second user via said
second user's mobile communicator, personal information relating to said first user
upon receipt of authorization from said first user, using said first user's mobile
communicator,
 said server additionally being operative, following:
 provision to said first user of said personal information relating to said
second user; and
 provision to said second user of said personal information relating to
said first user,
 to enable communication between said first and second user via said first
user's mobile communicator and said second user's mobile communicator.

28. An introductions system according to claim 27 and wherein said server is operative to provide said personal information generally in real time with respect to said designation.

29. An introductions system according to claim 27 and wherein said plurality of mobile communicators comprises at least one cellular telephone.

30. An introductions system according to claim 27 and wherein said plurality of mobile communicators comprises at least one wireless personal digital assistant (PDA).

31. An introductions system according to claim 27 and wherein said server is operative to determine if said first person is a subscriber to said introductions system.

32. An introductions method comprising:
storing personal information relating to a plurality of users of a corresponding plurality of mobile communicators;
providing to a first user of said plurality of users, via said first user's mobile communicator, said personal information of a second user of said plurality of users, upon said second user designating said first user by using said second user's mobile communicator, said designating comprising:
employing a mobile communicator location functionality for providing a visually sensible map indicating the relative locations of a plurality of said mobile communicators which are in communication with said server in a space;
employing said second user's mobile communicator to receive said map;
designating the location on said map of said first user; and
determining a mobile communicator address of said first user;
providing to said second user via said second user's mobile communicator, personal information relating to said first user, upon receipt of

authorization from said first user, using said first user's mobile communicator; and
following:

said providing to said first user of said personal information relating
to said second user; and

said providing to said second user of said personal information
relating to said first user,

enabling communication between said first and second user via said first
user's mobile communicator and said second user's mobile communicator.

33. An introductions method according to claim 32 and wherein said
providing said personal information comprises providing said personal information
generally in real time with respect to said designating.

34. An introductions method according to claim 32 and wherein said
plurality of mobile communicators comprises at least one cellular telephone.

35. An introductions method according to claim 32 and wherein said
plurality of mobile communicators comprises at least one wireless personal digital
assistant (PDA).

36. An introductions method according to claim 32 and also comprising
determining if said first person is a subscriber to an introductions system.
